

Numbers: Your Big Picture

It isn't so important to have the exact numbers; use estimates. The value is in seeing the big picture and all you need for that is a good enough estimate.

| Important Numbers | Last Month: | Last Year: |
|-------------------|-------------|------------|
| Earnings | \$ | \$ |
| - Spending | \$ | \$ |
| = Difference | + / - | + / - |
| Progress | | |
| Debt | + / - | + / - |
| Savings | + / - | + / - |

Any money that came in: wages, investments, child support...

Look at bank &/or credit card statements. Include housing, car, debt, food, healthcare... everything.

How much your debt decreased (or increased), not how much you paid. Include all debt.

Did you? How much did it increase (or decrease)?

Did you have anything left over?
